

PNEUMATIC BLADE VALVE

COMPACT VALVE SOLUTION FOR SAFE SHUT-OFF

- Shuts off concrete flow automatically when the pump is stopped, allowing the operator to focus on running the pump
- Reduces the risk of hose whip by minimizing boom draining, reducing amount of air trapped in the boom system
- Compact enough to fold up the boom without removing the unit
- Mounts immediately before or after the last tip elbow without damaging the boom hose
- Rebuildable

Part #	Description
147-22531	12v Boom Shut-Off Valve Kit
147-22530	24v Boom Shut-Off Valve Kit
