

SEAL KITS

FOR HYDRAULIC CYLINDERS

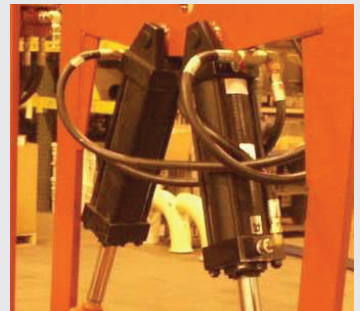

FOR VALVES: V30HYD, V40HYD, V50HYD, V50HYDDD, V5060HYDDD

There were three generations of cylinders used by Con Forms in the past. All the cylinder generations are interchangeable. The cylinder Part number is 050P16147.

GENERATION 1: NOPAK DESIGN

This design is identified by its "Tie Rod" style architecture and Trapezoidal Mounting ears on the main body. These cylinders were used in valves sold from Pre-2007 and 2011 to mid-2016.

SEAL KIT P/N: 050P16230

GENERATION 2: US CYLINDER

This cylinder is identified by its welded design and Trapezoidal Mounting ears on the main body. These cylinders were used in valves sold from 2007-2010.

NON-REBUILDABLE

GENERATION 3: PRINCE CYLINDERS

This cylinder is our latest design going forward. Also a welded design, these cylinders have rounded mounting ears on the main body. Used from Mid-2016 to now.

SEAL KIT P/N: 050-25558
